

I am a Flight Attendant. I have been flying for over seven years now and cell phones are one of our worst nemesis. I have personally had to have a passenger removed from the aircraft for failure to terminate a cell phone call. I urge to vote no for allowing the use of cell phones on the aircraft. In closing let me remind you that the terrorists of Sept 11, used devices to communicate with one another. If you allow the use of cell phones on the aircraft I believe you will be better equipping the terrorists who are plotting daily to attack the US and our Allies.
